

Teladoc Health Lite and Lite with Boom Camera

Always-on virtual care for emergent clinical settings

As the healthcare landscape shifts, hospitals and health systems need to extend care and expertise into more use cases and environments—including rural and underserved areas—with integrated virtual health devices.*

The Lite and Lite with Boom Camera are designed to make virtual visits feel more natural, expanding virtual care across your organization. Purpose-built for crowded, noisy patient locations, the Lite provides a more authentic virtual care experience for your staff and patients. Empower remote clinicians with the tools and confidence required to make quick, informed decisions.

Transforming care delivery and reach

Teladoc Health offers a fully integrated suite of connected care solutions to help hospitals and health systems of all sizes offer innovative in-house telehealth solutions to their patients.

Our clients benefit from best practices developed through over 1,500 telehealth implementations

The Lite and Lite with Boom are just one part of an enterprise-wide virtual care solution designed to support personalized care in any environment and harness data analytics through a single platform to improve the health of whole communities.

Key benefits

24/7 proactive fleet (or system) monitoring
ensure the most reliable virtual care delivery

Extend clinical expertise
whenever and wherever it's needed with a highly portable and durable device

Simulate face-to-face patient care with touch screen capabilities, an intuitive user interface and comprehensive workflows

Lite with Boom Camera

Use the Lite with Boom Camera to obtain a clear view over local care teams while simultaneously viewing precise patient vitals in crowded locations

Platform designed to support additional software module updates and capabilities

Four-speaker audio system for crystal clear dialogue

Storage compartment for secure peripheral storage

Enhanced peripheral integration for real-time streaming of valuable medical data from live auscultation and HD medical imaging equipment

High-definition (HD) cameras for clearer situational awareness and detailed examination

Intuitive touch screen interface provides a best-in-class user experience

Compact, maneuverable design fits below a hospital bed

Single, deep-cycle battery is designed for the rigors of hospital environments

* Use of the word "device(s)" in this document refers to Teladoc Health telehealth products, not medical devices as defined in Section 201(h) of the FD&C Act.

About Teladoc Health: Teladoc Health is on a mission to empower all people everywhere to live their healthiest lives. As the world leader in whole-person virtual care, the company leverages its 20+ years of expertise and data-driven insights to meet the growing needs of consumers and healthcare professionals across the full care continuum, at every stage in a person's health journey.
